Hello. I am Sally from Cambridge, England. I am your new pen friend. Let me write about myself. I live with my parents and brother, Jason. I enjoy reading biographical books. I think they are fascinating. My favorite hobby is making accessories from shells, you know, bracelets, earrings... I usually spend about an hour every day on it, but on the weekends I sometimes spend the whole afternoon making a nice bracelet. I also like listening to hip-hop music in my free time. I find it relaxing, but I can't stand jazz music. I find it ridiculous. I like wearing casual clothes while meeting my friends at a park or café.

Please write about yourself.

They are: maths, science, language, craft, music, and art. My mom taught me some hand-made decorations, how to draw, and how to play the piano. I learn numbers, do experiments and Spanish from my dad. I don't have to wear a school uniform, get on the bus early in the morning and go to a school or attend an exam. Some psychologists say that teenagers generally use computers to surf the web, join social sites, chat room discussions and play video games. In recent years, teens have started to use the computer too much and the Internet replaced TV. It is very comfortable and relaxing just to sit down and have a chat with somebody from a foreign country about sports, music or art.

If they are hungry, they simply order a pizza through the Internet. While they are waiting for the food, they check their Facebook messages, upload photos and change their profile pictures and even leave a message on their friends' Facebook walls.

So, they don't have much time for meeting people at a café and talk about a topic. I believe using the computer is becoming an addiction, too.

Which of the questions has **NO** answer in the text above?

- A) What do young people use the Internet for?
- B) How do the teenagers connect to the Internet?
- C) Do teenagers prefer face to face communication?
- D) Why do people prefer chatting on the Net?

Sally : I have only one account. I rarely spend time on social networking sites. I follow technological inventions and developments, especially in cars.

Bob : I have no social networking sites. I think these sites are not useful for students. If you have one of these accounts, you must often be online to see your notifications and comments.

What did Mr. Rock ask his students?

- A) Do you have any social media accounts, and how do you access the internet?
- B) Why are social networking accounts so popular among teenagers?
- C) How many social networking accounts do you have and what do you use them for?
